

FLASHING YELLOW LEFT-TURN SIGNALS

The City of San Dimas has recently installed a flashing left-turn arrow at the intersection of San Dimas Avenue and Bonita Avenue.

WHAT DOES A FLASHING YELLOW ARROW MEAN?

This traffic signal light means turns are permitted, but you must first yield to oncoming traffic and pedestrians and then proceed with caution. The graphic below outlines the rules of the road for traffic signal arrows, including flashing yellow arrows.

BENEFITS OF A FLASHING YELLOW ARROW

- Reduces delays by allowing more opportunities for left turns
- According to national data, can decrease the likelihood of left-turn collisions by up to 20%
- Increases efficiency of the signal operation

The Flashing Yellow Arrow is published in both the Federal and California Manual on Uniform Traffic Control Devices (MUTCD) and has already been implemented successfully in jurisdictions in California and other states.
